RE: Georgia Pacific (GP) Mill Site Class IIIb Landfill
Closure/Post Closure Cost Revision
SW201

Dear Mr. Lay:

The Division of Waste Management and Radiation Control has completed its review of the closure/post closure cost revision submitted on June 23, 2015 via email from Teri Peterson of Environmental Resource Management (ERM). This revision is required by the landfill permit (#1002C).

The Division will continue to waive the closure costs as outlined in a March 18, 2010 letter for the financial assurance since GP is currently using the gypsum material for beneficial reuse as an agricultural soil amendment. The Division concurs with the financial assurance for the post-closure portion which will remain in effect.

If the gypsum piles cannot be removed for beneficial reuse, GP will be responsible for the cost to contour the stockpiles, construct a soil cap and provide reseeding of the cover as described in the Permit.

If you have any questions, please call Doug Taylor at (801) 536-0240.

Sincerely,

Scott T. Anderson, Director
Division of Waste Management and Radiation Control
